| Clonality                  | Polyclonal                                                                                                                                                                                                                                                 |
| Product Description        | This gene encodes a member of the receptor expression enhancing protein family. Studies of a related gene in mouse suggest that the encoded protein is found in the cell membrane and enhances the function of sweet taste receptors. Alternative splicing |
| Species Reactivity         | Mouse, Rat                                                                                                                                                                                                                                                 |
| Application                | ELISA, IF, WB                                                                                                                                                                                                                                              |
| Category                   | Antikörper                                                                                                                                                                                                                                                 |
