| Species Reactivity         | Gallus                                                                                                                                                                               |
| Immunogen                  | Chicken IgG F(c) fragment                                                                                                                                                            |
| Conjugation                | Biotin                                                                                                                                                                               |
| Product Description        | Rabbit anti-chicken IgG recognizes chicken IgG F(c) fragment. This secondary antibody was purified using antigen affinity chromatography. The antibody is conjugated with Biotin.... |
| Buffer                     | Lyophilized from 20 mM KH <sub>2</sub> PO <sub>4</sub> , 150 mM NaCl, pH 7.2 (0.01% sodium azide)                                                                                    |
| Form                       | Lyophilized                                                                                                                                                                          |
| Application Dilute         | The optimal working dilution should be determined by the end user.                                                                                                                   |
