| Category                   | Biochemikalien                                                                                                                                                   |
| Product Description        | SARS-CoV-2 Spike RBD Protein (rFc) is expressed in HEK293 mammalian cells. The predicted molecular weight is 50.3 kDa and the accession number is A0A6G7K2L4.... |
| Molecular Weight           | 50.3 kDa (predicted)                                                                                                                                             |
