| Category                   | Biochemikalien                                                                                                                                                                                                                                             |
| Product Description        | IL-13 is an immunoregulatory cytokine produced primarily by activated Th2 cells, and also by mast cells and NK cells. Targeted deletion of IL-13 in mice resulted in impaired Th2 cell development and indicated an important role for IL-13 in the expuls |
| Molecular Weight           | Approximately 12.1 kDa, a single non-glycosylated polypeptide chain containing 110 amino acids.                                                                                                                                                            |
| Source                     | Escherichia coli.                                                                                                                                                                                                                                          |
| Purity                     | >95% by SDS-PAGE and HPLC analyses.                                                                                                                                                                                                                        |
| Form                       | Sterile Filtered White lyophilized (freeze-dried) powder.                                                                                                                                                                                                  |
