Product Datasheet

Anti-GFAP Purified, Clone: [GF-01], Monoclonal EXB-11-255-C100

microtubules. GFAP (glial fibrillary acidic protein) was discovered by Bignami et al.		
Supplier Catalog Number Alternative Catalog Number EXB-11-255-C100 Manufacturer EXBIO Category Antikörper Application ICC, IHC-P, IP, WB Species Reactivity Feline, Human, Porcine Pellet of porcine brain cold-stable proteins after depolymerization of microtubules. GFAP (glial fibrillary acidic protein) was discovered by Bignami et al. (1972) as a major fibrous protein of multiple sclerosis plaques. It was subsequently found to be a member of the 10 nm or intermediate filament protein family, specifically the i Clonality Monoclonal	Article Name	Anti-GFAP Purified, Clone: [GF-01], Monoclonal
Alternative Catalog Number EXB-11-255-C100 Manufacturer EXBIO Category Antikörper Application ICC, IHC-P, IP, WB Species Reactivity Feline, Human, Porcine Immunogen Pellet of porcine brain cold-stable proteins after depolymerization of microtubules. GFAP (glial fibrillary acidic protein) was discovered by Bignami et al. (1972) as a major fibrous protein of multiple sclerosis plaques. It was subsequently found to be a member of the 10 nm or intermediate filament protein family, specifically the i Clonality Monoclonal	Biozol Catalog Number	EXB-11-255-C100
Manufacturer EXBIO Category Antikörper Application ICC, IHC-P, IP, WB Species Reactivity Feline, Human, Porcine Pellet of porcine brain cold-stable proteins after depolymerization of microtubules. GFAP (glial fibrillary acidic protein) was discovered by Bignami et al. (1972) as a major fibrous protein of multiple sclerosis plaques. It was subsequently found to be a member of the 10 nm or intermediate filament protein family, specifically the i Clonality Monoclonal	Supplier Catalog Number	11-255-C100
Category Application ICC, IHC-P, IP, WB Species Reactivity Feline, Human, Porcine Pellet of porcine brain cold-stable proteins after depolymerization of microtubules. GFAP (glial fibrillary acidic protein) was discovered by Bignami et al. (1972) as a major fibrous protein of multiple sclerosis plaques. It was subsequently found to be a member of the 10 nm or intermediate filament protein family, specifically the i Clonality Monoclonal	Alternative Catalog Number	EXB-11-255-C100
Application ICC, IHC-P, IP, WB Species Reactivity Feline, Human, Porcine Pellet of porcine brain cold-stable proteins after depolymerization of microtubules. GFAP (glial fibrillary acidic protein) was discovered by Bignami et al. (1972) as a major fibrous protein of multiple sclerosis plaques. It was ubsequently found to be a member of the 10 nm or intermediate filament protein family, specifically the i Clonality Monoclonal	Manufacturer	EXBIO
Species Reactivity Feline, Human, Porcine Pellet of porcine brain cold-stable proteins after depolymerization of microtubules. GFAP (glial fibrillary acidic protein) was discovered by Bignami et al. (1972) as a major fibrous protein of multiple sclerosis plaques. It was ubsequently found to be a member of the 10 nm or intermediate filament protein family, specifically the i Clonality Monoclonal	Category	Antikörper
Pellet of porcine brain cold-stable proteins after depolymerization of microtubules. GFAP (glial fibrillary acidic protein) was discovered by Bignami et al. (1972) as a major fibrous protein of multiple sclerosis plaques. It was subsequently found to be a member of the 10 nm or intermediate filament protein family, specifically the i Clonality Monoclonal	Application	ICC, IHC-P, IP, WB
Product Description GFAP (glial fibrillary acidic protein) was discovered by Bignami et al. (1972) as a major fibrous protein of multiple sclerosis plaques. It was ubsequently found to be a member of the 10 nm or intermediate filament protein family, specifically the i Clonality Monoclonal	Species Reactivity	Feline, Human, Porcine
Product Description (1972) as a major fibrous protein of multiple sclerosis plaques. It was ubsequently found to be a member of the 10 nm or intermediate filament protein family, specifically the i Clonality Monoclonal	Immunogen	Pellet of porcine brain cold-stable proteins after depolymerization of microtubules.
· · · · · · · · · · · · · · · · · · ·	Product Description	
Concentration 1 mg/ml	Clonality	Monoclonal
	Concentration	1 mg/ml
Clone Designation [GF-01]	Clone Designation	[GF-01]
Isotype Mouse IgG1	Isotype	Mouse IgG1
Buffer Phosphate buffered saline (PBS), pH 7.4, 15 mM sodium azide	Buffer	Phosphate buffered saline (PBS), pH 7.4, 15 mM sodium azide
Storage 2°C to 8°C	Storage	2°C to 8°C

Target	GFAP
Antibody Type	Monoclonal Antibody
Application Notes	Immunohistochemistry (paraffin sections): Recommended dilution: $10~\mu g/ml$, positive tissue: human brain (cortex, cerebellum). The antibody GF-01 strongly stains astrocytes in human brain tissue sections but it is essentially negative on mouse and rat tiss
