| Immunogen                  | Synthetic peptide within Human PCAF aa 121-211 .                                                                                                                                                                                                              |
| Conjugation                | Unconjugated                                                                                                                                                                                                                                                  |
| Product Description        | In the intact cell, DNA closely associates with histones and other nuclear proteins to form chromatin. The remodeling of chromatin is believed to be a critical component of transcriptional regulation and a major source of this remodeling is brought a... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
| Concentration              | 1 mg/mL.                                                                                                                                                                                                                                                      |
| Clone Designation          | [JU88-63]                                                                                                                                                                                                                                                     |
| Molecular Weight           | 93 kDa                                                                                                                                                                                                                                                        |
